Our portfolio of illustrators was formally born in January 2021 inside the **Ute Körner Literary Agency**, founded in 1984.

We are interested in illustration as a fundamental part of children's literature, but not only of it. The experience that gives us being one of the leading agencies in our territory in children's and youth literature, together with the passion we feel for illustration, has made us naturally bet on the representation of illustrators.

We want to accompany them in their careers in the same way that we accompany our authors: **with care, attention, dedicating time and globally.**

That is why we want our portfolio to be **managable in number, to be mainly made up of Km0 illustrators**, with whom we can have a close, direct and transparent contact. This is how we understand our work.
