Environmentally sustainable production – the keystone of our green publishing philosophy!

"Sustainability is not only an integral part of our DNA and publishing routine since the very beginning but nowadays also touches all areas of life. We are going to make our contribution."

Ralf Rebscher, Managing Director

In order to keep transit distances short and CO₂ emissions low, we exclusively print and produce in Germany or nearby European countries.

We are a member of FSC® Germany and print virtually all of our books on FSC®-certified paper from responsible sources.

For our products, we use natural vegetable-oil-based ink, solvent-free glues, and water-based varnishes and forgo plastic wrappings to reduce waste.

We take our responsibility for a sustainable handling of our resources seriously. Hence, we are constantly working on improving our sustainable production.

Additionally, we support animal welfare around the world and plant trees in local woodlands, among other things.
