Learn to add with crossword puzzles

This puzzle pad series includes crosswords and sudoku puzzles – the most popular puzzle types for this age group – and is precisely tailored to the skills of school beginners. It's not just fun – children also learn through play as they practice foundational school skills such as reading, writing and basic numeracy.

A different kind of crossword puzzle: instead of finding words, children have to solve basic addition and subtraction questions. Children aged 6+ can practice their first arithmetical operations in a playful way, while learning to write their numbers. The puzzles are based on the number range taught in 1st grade, and have been designed by experienced teachers.

- Adding and subtracting with numbers up to 20.
- Designed by experienced teachers.
- More than 750.000 copies by Silke Reimers sold in German.

Discover with Benny Beaver how things work

Benny Beaver is involved in every adventure. Among other things, he's a master builder. He's always eager to learn something new – in the forest and anywhere else. There's a lot to learn about our environment and Nature. This eventful tale about Benny Beaver and his friends Daisy Duck, Sally Squirrel and Manny Mole is great fun, as is the audio book with its sounds of Nature.

How does flying work? Benny Beaver and his friends are anxious to find out, because Sally Squirrel is due to take part in a big air show. Will a rocket help her? Or an airplane? Or a hot air balloon? Luckily, Benny Beaver is a master builder. Through their experiments, the friends discover simple principles of physics: gravity and lift, rocket propulsion and block and tackle. The lively story enhances technical knowledge and is accompanied by an audio file available for downloading.

- **Lessons and experiments with Benny Beaver.**
- **Helps children to understand technology.**
- **With simple experiments for children to do themselves.**
- **More than 180.000 copies of the series in German sold!**

DISCOVER THE ANIMALS SERIES

How do animals in our gardens, fields and forests live? How do they build their homes? How do they rear their offspring? The successful duo Friederun Reichenstetter/Hans-Günther Döring knows how to captivate girls and boys. Their beloved picture book series ANIMALS IN THE WILD consists of 20 volumes and has sold over 1 million copies so far. Children also meet the most popular animals in these lovely illustrated wildlife board books in the spin-off series DISCOVER THE ANIMALS. Children can then apply the knowledge with the MY BIG ANIMAL STICKER BOOK series, finally test their knowledge with the QUIZ YOURSELF SMART series and practice how to draw the animals in the ANIMALS FOR TRACING series. STAND-ALONE TITLES

Our stand-alone non-fiction titles offer fascinating information about current issues in an engaging and fun way. Kids can learn about a wide range of topics, such as the Fridays for Future movement or internet security, in a way that is both educational and entertaining.

YOU FOR FUTURE

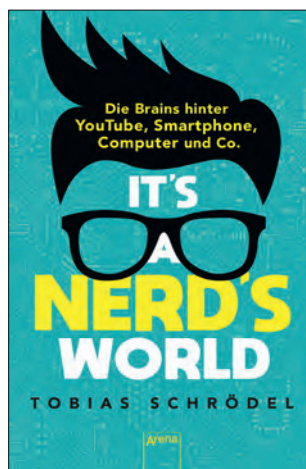

'We will not stop demonstrating,' writes Franziska Wessel in a guest column in the Berliner Zeitung. Franziska is pursuing a goal. Decisive measures must finally be taken to protect the climate. While that is not happening, she spends every Friday on the streets, gives interviews and puts pressure on politicians. But climate change isn't the only thing threatening our future. There is so much suffering, injustice and destruction in the world. Something must be done about it. And as a climate activist, Franziska knows exactly how to be active. Together with her father, the journalist and author, Günther Wessel, she explains: How do I start a petition? How do I organise a campaign? How does lobbying work? So that everyone knows how they can make things happen.

IT'S A NERD'S WORLD. THE BRAINS BEHIND YOUTUBE, SMARTPHONES, COMPUTERS & CO.

Smartphone? Cool. The internet? How could you live without it?! It's time to celebrate the people who made it possible. Tobias Schrödel, IT expert and Germany's first comedy hacker, tells stories about the nerds whose hardware, software and internet applications have changed all our lives forever – and that no-one knows. That has to change! Honour to whom honour is due! But be careful: things get absurd, funny, tragic and only a little bit educational.

WTF?! How the Internet Works

Everyone uses it. All day, hour after hour. The Internet! But does everybody understand the Internet? For instance, how does anonymity work in the dark net? And is everything in it illegal? Why do people bully others so viciously online? Can I write and post whatever I like on social media? Why is everyone so concerned about user data? Psychologist Nora Wunderlich, IT security expert Tobias Schrödel, and lawyer Christian Solmecke provide the answers, interspersed with funny anecdotes and examples.

CLIMATE CHANGE. WHAT WE CAN DO NOW

“There is no Planet B!” More and more young people are worried about the future of Planet Earth. Climate change is heating not only the planet but also people’s emotions. But what exactly is climate? And why are the changes threatening the lives of both polar bears and us humans. In simple language but with solid science, the authors explain the most important aspects of climate, from the greenhouse effect to the Gulf Stream. Current developments are described as well, and the scientific background is supplemented by gripping reports. The book also offers a glimpse of the future: what will happen if we go on in the same way as now? How can climate change be halted? This makes for riveting reading – and not just for young activists.

29 WINDOWS TO YOUR BRAIN. INGENUOUSLY SIMPLE EXPLANATIONS FOR WHAT IS HAPPENING INSIDE OUR HEADS

How’s the purple cow doing? Pretty darn hard to NOT think of something, right? But did you know that you CANNOT tickle yourself?

With the aid of examples taken from daily life, numerous self-tests and exciting insights into current research, the two physicians Alexander Rösler and Philipp Sterzer explain how our brains work. In 29 short chapters they cover the most essential information about our perception, motions, language, love, sleep, memories and our free will.

Includes a large brain map on flap.
