FIND YOUR STRENGTH AND RECOGNIZE WHAT YOU ARE CAPABLE OF

Date of publication: April 29, 2026

Rights sold to: Czech Republic (Euromedia), The Netherlands (HarperCollins), Slovakia (Tatran), Poland (Helion), Portugal (Lua de Papel), UK/World English (PRH/Ebury)

The power to change your life lies within you: recognize it and learn to use it

The quick and easy path is always in front of us, always available. But such a path will never unlock our full potential and ultimately can never make us happy. To realize what we are capable, we must discover what our limits are, because only then will we be able to transcend them.

In "Shaolin Life", Sacha Wenk describes how the millennia-old traditions and wisdom of kung fu have fundamentally transformed his life, and he reveals how we too can make our life the life we truly want to live. Focus, courage, discipline, patience, and humility – structured by the five central virtues of Shaolin kung fu, his book will help us awaken, step by step, the power that already lies deep within us, enabling us to achieve any goal we set our mind to.

- Sacha Wenk is known worldwide as "The Shaolin Kid": nearly 4 million followers on Instagram and 1.7 million on TikTok, online courses, kung fu retreats, TV productions (China, USA, Germany), Tedx talk, documentary film

Sacha Wenk, born in Singapore in 1999 to a Swiss mother and German father, spent his childhood in Shanghai and Beijing, where at an early age he developed a passion for kung fu. After the family moved to Munich, he grew increasingly disenchanted with Germany's competitive society. China continued to hold an attraction for him, and at 17 he returned. He entered the famous Shaolin Monastery, began training with his Shifu Shi Miao Hai, and devoted himself to the teachings of kung fu. Today, he shares these teachings via his social media channels as @The Shaolin Kid and is internationally regarded as one of the most important ambassadors of Shaolin kung fu. He is the initiator and trainer of the biannual Shaolin Warrior Intensive Week in Champéry, Switzerland. He has TV productions to his credit, is the subject of a two-year documentary film project, and is slated to give a TedX Talk in Paris in November 2025.

The popular actress writing about the power of kung fu, the struggles in her life, and the path to self-discovery

The actress Mai Duong Kieu is known to many from series such as "Bad Banks", "In aller Freundschaft" and "Kleo". What is less well known is that her path has been anything but easy. At the age of five, she moved with her mother from Vietnam to East Germany to join her father, who was working as a contract worker in Karl Marx Stadt. It was a tough, unprotected childhood in a foreign country that was not always friendly.

"In Your Heart, You Are Invincible" tells the story of Mai's tenacious struggle for self-determination and her unshakeable determination not to be held down. One thing in particular that helped her achieve this was Shaolin Kung Fu. Her father, a Kung Fu master, expected his daughter to be his best student. She learned to fight as a small child. The training was tough, but it became her salvation. It was the principles of Shaolin Kung Fu that made Mai the woman she is today, one who fearlessly follows her own path.

A moving memoir and an inspiration for anyone who wants to find greater strength and gain more confidence.

- An extraordinary and inspiring life story
- The first book by a woman on the trending topic of Shaolin Kung Fu

In Praise of Discomfort

HOW I LEARNT TO LOVE LIFE'S ICE BATHS

Date of publication: October 15, 2025

How to shift your perspective and find happiness outside your comfort zone – by the author of the bestselling "The Diet Compass"

With hindsight, the toughest times often turn out to be the most valuable. But in a world that prizes comfort and ease above all, we do everything we can to avoid being challenged. What if, instead, we embraced the obstacles life puts in our way as a chance to find happiness?

In this philosophical essay, Kast examines why we avoid discomfort – pain, hunger, conflict, stress – and what we miss out on as a result. Whether it's exercise, fasting, frank conversations or unpleasant feelings, In Praise of Discomfort argues that we shouldn't view strain and hardship as enemies, but as allies that can help us grow. An inspirational book for anyone who wants more from life than ease and instant happiness.

- An insightful, inspiring essay by the popular author of no. 1 bestsellers "The Diet Compass" (211 weeks in the Spiegel charts) and "The Soul Compass" (38 weeks in the Spiegel charts), which have sold more than 1.8 million copies
- For fans of Brianna Wiest and John Strelecky

Unlock Your [AI]dentity

THE MOST IMPORTANT FUTURE SKILLS AND HOW WE CAN ACQUIRE THEM WITH THE HELP OF ARTIFICIAL INTELLIGENCE

Date of publication: March 25, 2026

Promoting and strengthening personal development and self-optimisation with the help of AI

AI tools such as ChatGPT have become part of our everyday lives. Yet while most people use them merely to increase efficiency, they generally overlook their revolutionary potential: AI can actually help us live more consciously, think more clearly, and understand ourselves better.

"Unlock your [AI]dentity" is the first systematic approach to using AI for personal growth. Instead of relegating your thinking skills to machines, you will learn to use AI as an intelligent sparring partner for developing sharper critical thinking, deeper self-reflection, and more creative problem-solving skills.

This book provides concrete methods and proven prompts that can be used with AI to develop emotional intelligence, strengthen resilience, and identify weak areas and blind spots.

Discover AI as a mirror and tool for personal development and consciously shape your future in the age of AI.

- With a large practical section – helpful exercises, everyday instructions, and targeted prompts for personal and professional challenges
- Health tech expert Céleste Spahić conducts research at the interface between humans and technology at the Fraunhofer Institute, Charité, and Max Planck Institute

Develop your personal AIQ

In a world where artificial intelligence permeates so much around us, the question is no longer whether we will work with AI, but rather how we can do so as effectively as possible. AI experts Christoph Santner and Christine Papadopoulou present here their fascinating new concept, the Artificial Intelligence Quotient, or AIQ, which is a measurable ability that can determine our future potential development in education, work life, and personal growth.

Drawing on groundbreaking scientific studies, the authors demonstrate that AIQ is a distinct form of intelligence fundamentally different from IQ, emotional intelligence, and social intelligence. As current research has shown, people have diverse abilities in using AI systems effectively – and such ability can be learned and improved. AIQ is the next step in human evolution: an emerging symbiotic combination of human and artificial intelligence, in effect a hybrid form that combines the best of both worlds. And while classic IQ remains the same throughout life, the "AIQ muscle" can grow continually through training. Santner and Papadopoulou present here a five-step plan for systematically increasing your AIQ. This is a book for all who want to take their applied artificial

RECOGNIZING AND OVERCOMING EVERYDAY DEPENDENCIES

Date of publication: July 22, 2026

Put an end to doom scrolling, excessive alcohol consumption, emotional eating, and other habits

In a world of constant availability – from information and entertainment to consumer goods – we are increasingly losing the ability to consciously shape our lives. While digital media compete for our attention, material goods lure us with the promise of fulfillment. Fast food, alcohol, and other luxury goods are available around the clock, and superficial social contacts convey an illusion of connection. This book invites us to free ourselves from negative patterns of behavior and thinking. Only then can we discover new freedoms, recognize what is truly essential to our happiness and what stands in its way. Fundamental is the principle of mindfulness challenges: short periods in which we consciously refrain from certain substances or behaviors and mindfully observe the positive effects we notice in ourselves.

The authors support us with practical guidance and insights from positive psychology, and behavioral science. Along with mindfulness methods, there are numerous reflection and mindfulness exercises. With the help of these many flexible tools, we can shape our own path to a more conscious life.

- Doom scrolling, alcohol consumption, emotional eating, and the like, are now a thing of the past
- Experts in mindfulness, positive psychology, and behavioral research offering sound and practical guidance

FINALLY PUT AN END TO ANNOYANCE, ANGER, AND FRUSTRATION
 10 SIMPLE STEPS TO MORE SERENITY IN EVERYDAY LIFE

Date of publication: June 10, 2026

I could explode! Why we no longer need to be at the mercy of our anger – 10 steps for leaving our continual turmoil behind

Do you feel at times overwhelmed by annoyance, frustration, or anger? Do you get repeatedly upset – about politics, the children, the morning commute and traffic jams? Getting upset might provide short-term relief, but in the long run this stress will wreck you physically and mentally. The good news is that you can learn to control such emotions.

With their tried and tested anti-agitation training program, Manfred Schedlowski, a professor of medical psychology and behavioural immunobiology, and the science journalist Gaby Miketta show how this can be done. In 10 simple steps (1 hour per week for each step), this program helps you recognise and minimise your personal triggers and leave unnecessary feelings of anger and irritation behind you. Practical exercises, illustrative case studies, and effective strategies for inner peace will support you on your path to calmness.

- Clear explanations and strategies easy to implement in both professional and private life – training in impulse control in anger situations
- An array of specific exercises and strategies

WOLF KÜPER

Take. Your. Time.

HOW TO RECONQUER LIFE

Date of publication: March 18, 2026

How to take back time and find happiness

Our society is apparently affluent, and we're supposed to have everything we need. But what does affluence really mean? Statistics show that as we drown in superfluity, happiness has stagnated. What can we do about it?

"Take. Your. Time." examines what we actually need in order to be happy. Based on the latest happiness and time research, and on Küper's numerous encounters with a wide range of people, it shows us that what we need isn't more stuff: it's more time. Without time, there's no happiness. But in this day and age, time has become a scarce resource.

Still, it's never too late. This insightful, inspirational, smart and humorous book reveals how to rethink our relationship with time, explains how we can use it to attain happiness, and shows us that a truly good life doesn't depend on abundance or hide behind a paywall – in fact, it's much closer than we think.

Together, the Küpers went on a years-long trip around the world, which Küper wrote about in his funny and thoughtful travel account "One Million Minutes" (Bonnier, 2020). The book became a bestseller, was translated into several languages, and in 2024 was turned into a film. Following further trips around Asia and Australia, and – according to his family – a reasonably successful second career as a house husband, he spent six years teaching in South Africa. He is now a quality-time consultant and life coach (and would quite like to be a surfing instructor too), and divides his time between Cape Town, Bonn and Aix-en-Provence.

PRACTICAL SOLUTIONS FOR AN EASIER LIFE

Date of publication: May 13, 2026

The world is a friendly place!

If you think this statement is wrong, you have fallen victim to your own expectations and are trapped in a mindset of fear, doubt and perceived hopelessness. The result of this self-deception is a feeling of resignation, when what we need most urgently is radical confidence. Dr Ulrich G. Strunz proves that this belief is based on a figment of the imagination called "expectations". Using the latest neurological findings, he shows how our brain forms these toxic expectations based on individual physiology, past experiences and negative news. However, he also explains that these expectations have very little to do with reality and a great deal to do with widespread and paralysing fears about the future. His book shows us a way out of this perceived hopelessness.

- Behavioural economist Dr Ulrich G. Strunz shows how we can overcome toxic expectations and achieve a fulfilling life.
- How to establish new positive beliefs based on scientific findings from research and neurology
- With practical solutions for people seeking self-help and readers of Hans Rosling

Just carefree – how would that be?

Your mind stops racing, your stress dissipates, and your fears fall away. No one annoys you anymore, nothing upsets you. You have made peace with your past and look forward to your future. Your thoughts dance and they sing, "It's wonderful to be alive!"

Does this seem unrealistic because you are immersed in worries right now? That's precisely the problem: you don't have worries – your worries have you! You need to turn the tables and take control of your thinking. You can make your worries disappear, and a great sense of ease will enter your life.

Spiegel bestselling author Martin Wehrle reveals how you can regain control of your inner self and achieve a life full of ease and fulfillment.

What Matters

50 LISTS FOR LIFE

Date of publication: April 22, 2026

With 4c images

A wise, funny companion with lists for everything that matters – from small talk to sports, from politics to physics

What truly matters in life? What do we need to know and do, to be considered educated and well-mannered? How can we become more political, what books should we read and what films should we watch? Which dishes should everyone know how to cook? How do we best offer our condolences, negotiate a raise and survive a crisis?

The humorous yet serious "What Matters" suggests a few answers – and shows how listing the essentially unlistable can make life easier and more manageable: lists can bring order to chaos and help set priorities. But the ones in this book are by no means complete, or indeed objective. Don't worry if some of them annoy you, or if you can think of a dozen things that should be included or, indeed, excluded – that's precisely what What Matters is all about: it will inspire you and provoke debate, and it's the best gift you can give your children as they prepare for life out there in the big wide world.

INSIGHTS FROM MEDICINE AND COACHING FOR A BETTER CONNECTION WITH YOURSELF
 BETTER HEALTH, SELF-DETERMINATION, AND HAPPINESS IN LIFE

Date of publication: February 25, 2026

10 illustrations

For a good life–health balance

Frauke Bataille, a medical doctor and coach, supports people who have lost touch with their inner selves and feel like they are mere extras in the film of their own lives. At the heart of her concept is 'Sensorship' – the human ability to consciously perceive and process both internal and external signals.

This book is a practical and medically sound guide to finding yourself and your own strength and developing a balanced inner compass. By combining insights from science, medicine, and psychology with vivid examples from her coaching practice, Frauke Bataille shows how emotional symptoms and bodily processes are linked. The book opens up a holistic path of development so that you no longer have to "live a life without yourself".

- Medical expertise meets coaching – new approaches to personal development
- A holistic mental health concept by an impressive author

Embodied Attachment

HEAL EARLY TRAUMA, REGULATE EMOTIONS, STRENGTHEN RELATIONSHIP SKILLS – ATTACHMENT-ORIENTED BODY PSYCHOTHERAPY (BKPT)

Date of publication: June 24, 2026

Overcoming early attachment injuries with the help of the body

Why does secure attachment need a body? Why are attachment experiences such as security, closeness, and belonging always embodied experiences? How can we use our bodies to recognize and avoid losing a relationship to ourselves and others at an early stage? Answers to these central questions are provided by Attachment-Oriented Body Psychotherapy (BKPT).

In his book, the professional psychologist and body therapist Thomas Harms describes how early developmental traumas can be integrated and then therapeutically addressed on the basis of somatic psychology and body psychotherapy models. The author draws on decades of observation of the processes of body-oriented parent–baby therapy to develop the foundations of modern body psychotherapy for adults. His innovative approach to body psychotherapy incorporates the latest theoretical and practical perspectives and working methods from scientific disciplines such as trauma, mindfulness, and attachment research.

ADHD in the Second Half of Life

LONG-TERM STRATEGIES FOR SUCCESSFULLY COPING WITH BEING DIFFERENT

Date of publication: April 29, 2026

How to live well with ADHD, even as we get older

ADHD during the second half of life is a topic that has thus far received little attention from those affected, their families, and medical and therapeutic professionals. Yet because ADHD often does not disappear with age and often persists for decades, it continues to pose a challenge as people get older. This book will help those with ADHD in old age gain a new, positive perspective on neurodivergence. Even in middle age, people with ADHD are confronted with symptoms that can change and worsen over the course of their lives. This is especially true if they have not yet been diagnosed or if the coping strategies they have been using no longer work as usual because of limited mobility, chronic illnesses, retirement, or other issues.

Dr. Astrid Neuy-Lobkowitz is an expert on ADHD in adults. Her new book – co-authored with Dr. Daniel Schöttle – is the first to address the topic of neurodivergence in the second half of life. In an understandable and empathetic way, the authors describe the changes in symptoms, the effects on everyday life, and the diverse resources and solutions that really help and contribute to improving quality of life.

- First book on the topic of how to age well as a neurodivergent person

THE NEUROTRANSMITTER GABA

Date of publication: June 10, 2026

Sleep disorders, depression, burnout, ADHD, stress, anxiety disorders, addictions – conditions often caused by a GABA deficiency

In German-speaking countries alone, millions of people suffer from conditions caused by mental stress, including sleep disorders, physical illnesses, anxiety and panic disorders, depression, burnout, ADHD, and addictions. All of these illnesses and conditions have one thing in common: a lack of GABA, an immensely important calming neurotransmitter, which our bodies produce, but often not in sufficient quantities. GABA can promote relaxation, encourage good sleep, reduce anxiety and stress, improve concentration, and positively influence mood. With the right diet, effective exercise, and dietary supplements, it is possible to counteract a GABA deficiency. In his book, physician Dr. Bernd Guzek explains for the first time what GABA is, how it works, and how it can easily be supplied to the body.

- The first book about the soothing neurotransmitter GABA – why we need it and how we can easily supply our bodies with it

Date of publication: February 25, 2026

Menopause at work – why nobody talks about it (and why that needs to change)

Women are "on fire", and menopause is supposedly a new beginning. But this topic is still taboo in the workplace. "The Menopower Book" breaks this unspoken taboo and supports women with specific tips and strategies for everyday working life and against unfair career setbacks. A quarter of women reduce their working hours, a third take sick leave due to typical symptoms, and almost one in five would like to retire early. Is this all acceptable? Ute Brambrink and Claudia Rieß believe it is not. They give affected women a voice and show ways in which women can make themselves heard, have their needs finally taken seriously at work, and even turbocharge their careers. After all, they are highly motivated and experienced, and the hormonal changes often make them even more assertive.

Live healthier for your liver!

More than one in four adults over the age of 40 in Western nations are currently affected by the new widespread condition of fatty liver. More and more younger people are developing this condition, and this is not necessarily related to alcohol consumption. Fat deposits in the liver are not harmless, as they set the stage for inflammatory and metabolic processes that affect the entire body, such as cirrhosis, liver cancer, diabetes, and cardiovascular disease. The proper functioning of this vital metabolic organ is crucial for a long life expectancy. The good news is that through a change in diet and lifestyle, the liver can regenerate relatively quickly.

This book helps us better understand how the liver works and the ways we can reduce the risk of fatty liver and its consequences. Liver-healthy recipe ideas and a 10-point program help restore the liver to its former vitality and keep it healthy for years to come.

Eat and Let Eat

FINALLY FINDING A MORE RELAXED APPROACH TO OUR DIET – PUTTING AN END TO FOOD NOISE AND THE CULT OF NUTRITION!

Date of publication: February 25, 2026

Put an end to nutritional dogma

Between food noise, "What I Eat in a Day" videos and the cult of self-optimisation, we now have all kinds of beliefs about nutrition that we have been taught since childhood. For many, eating has long been more than a necessity or pure enjoyment. "Eat" – not so easy, is it?

Science journalists Marlene Borchardt and Nora Burgard-Arp untangle the opaque web of misleading advertising messages and false beliefs. After all, constantly thinking about and judging food usually has little to do with real well-being. "Eat and Let Eat" is both a long-overdue angry response to the ubiquitous overemphasis on nutrition in our society and soothing soul food in book form. It is time we finally found a pressure-free and ideology-free relationship with nutrition.

Love, boundaries, and self-care – how to be a parent without becoming exhausted

To be loving parents without completely forgetting ourselves in the process is something we all hope for. But how incredibly difficult it is in everyday life when our child is obstinate and uncooperative, when we are increasingly exhausted, when there is a widening gap between our wishes and reality. And then, as parents, we start with threatening, and punishing, and resorting to things we will regret later that evening – simply because we feel so helpless.

This book helps in such moments. The family counselor Romina Alberti uses specific everyday situations to show us, step by step, how we should respond, even when things have become extraordinarily difficult. And she does so in a way that we won't feel alone with our distress, doubts, and dismay.

Not only sound advice, but a toolbox full of inspiration and playful tips as well – reality oriented and of great practical relevance.

Try using these words when...

Scolding and screaming damage our relationship with our children. But what words and positive expressions can help us take the best route in difficult moments – and instead of arguing, to feel close to each other again?

Attachment-oriented parenting coach Birgit Gattringer is familiar with the many everyday situations in which we as parents urgently need a different perspective or a fresh idea to show us how to proceed. She provides parents lighthearted, inspiring, and educationally sound support and brings together the most helpful phrases that parents can use again and again when things get heated or they begin to doubt themselves or their children.

A treasure trove of effective words and a companion for every day of family life.

- Great, effective sentences for everyday parenting
- Entertaining inspiration for raising children
- 50 easy-to-follow chapters using common situations and psychological contexts

ACCOMPANYING TEENAGERS WITH ADHD THROUGH PUBERTY WITH LOVE
 AND CLARITY

Date of publication: February 25, 2026

2-colour throughout

Your loving guide to ADHD during puberty

Puberty is a turbulent time full of profound changes – even more so for teenagers with ADHD. During puberty, neurodivergent behaviors often become more pronounced, challenging not only the young people themselves but also those around them, with their concentration problems, poor sleeping, severe mood swings, high impulsivity, and periods of depression. How can we provide support without taking away the freedom our teenagers need?

Melanie Klefeldt sees neurodivergence from three perspectives: as an experienced ADHD coach and specialist in autism spectrum disorders; as someone who herself was diagnosed late in life; and as the mother of a neurodivergent teenager. With kindness, humor, and clarity, she explains what goes on in the minds and hearts of young people with ADHD during this phase of life. She offers valuable insights, practical tips, and emotional support for parents and teachers, and answers the most pressing questions about adolescent neurodivergence: How should we talk to teenagers about their symptoms or diagnosis? When is medication and professional help appropriate? And how can we confront the increased risk of addiction associated with ADHD?

WHAT BABIES REALLY NEED AND HOW TO BOND SUCCESSFULLY

Date of publication: March 18, 2026

2-colour throughout

What carries parents and babies through the first year

Bonding relationships work best when we understand what makes our child tick and are open to accompanying them on their early life path. Correctly assessing the baby's needs, but also taking ourselves as parents into account, helps us not only in the first year of our baby's life, but also far beyond that time through life together as a family.

In her new book, the educator and Spiegel bestselling author Susanne Mierau explains how parents can build strong and secure bonds with their children and confront their own experiences and deal with stress with greater awareness. She explains how parents can develop strong roots to lovingly and confidently accompany their baby while creating space that gives the whole family ease and security – for equal relationships and secure family bonds.

- The new book by the widely read and well-networked Spiegel bestselling author, with over 170,000 followers on social media
- Relatable, clear, and encouraging

The Secret to a F*cking Good Life

HOW TO GET WHAT YOU REALLY WANT

Date of publication: November 12, 2025

A story about life's answers – a book like a hug from within

Josephine is dissatisfied with herself and the world. Once she had plans, but nothing came of them. Now she is at a turning point in her life and is faced with difficult questions: What do I actually want from life? Why do I always put off my happiness until later? And how do I recognise meaning of my life? With these weighty questions about life in her luggage, she returns to her home village and begins to write letters to life. And suddenly someone answers her as she remembers a long-forgotten encounter from her childhood ...

A book about life's large questions by the author of the Spiegel bestsellers "How to Get Rid of People Who Are Bad for You without Killing Them"; "Where There's AF*ck it, There's A Way"; and "I Think, Therefore I Am ... In My Own Way".

Julian Hermesen, born in 1987, is a psychologist, coach, and consultant. After university he worked as a consultant for executives and in change processes, but soon realized that he should search for answers to the larger questions of life. Extensive travels took him to the centres of Far Eastern wisdom from India to Thailand, where he questioned seekers, monks, and scholars about the secrets of a meaningful life. Their responses were the beginning of his personal transformation, as well as his holistic coaching approach, which he uses today to advise clients. With his debut book "The Millionaire and the Monk", he quickly reached a large readership.

The Art of Living on Eight Paws

WHY DOGS ARE THE TRUE PHILOSOPHERS

Date of publication: May 13, 2026

10 colour illustrations

Two dogs explain life to two-legged beings

Ancient philosophy from a dog's perspective? Of course, says author Dirk Grosser, because no one understands Diogenes, Epicurus, and the Stoics better than the two protagonists of this book. In a humorously profound way, he tells the story of two extraordinary four-legged friends who couldn't be more different from each other: Baldur, the distinguished and reserved English hunting dog, and Lilly, the fearless Spanish bulldog mix. Two canines who view life from fundamentally different philosophical perspectives.

The two furry friends turn the author's world upside down. They make it clear to us that we humans need contrasts in order to cope with both the normal everyday madness and deep crises: focus and a hammock, fangs and deep relaxation, self-discipline and letting go. The humorous text is complemented by illustrator Frank Schulz's affectionate and witty illustrations, as in the previous bestseller "Buddha on Four Paws".

- New canine wisdom from the author of the bestseller "The Buddha on Four Paws"
- Two dogs philosophizing about life with plenty of wordplay, mindfulness, and ancient wisdom

The Little Dervish and the Seven Questions of Life

Date of publication: April 29, 2026

4-colour throughout

A poetic essay, charming, affectionate, thoughtful

Who am I? What makes me happy? What does love mean? The little dervish's incessant spinning stirs up all these and other thorny questions in life. They preoccupy not only him, but all of us, sometimes for a lifetime. They gnaw at us, awakening a longing, a passionate desire for answers. In the midst of his twirling – a movement between heaven and earth – the little dervish strives for a silent dialogue with life itself while embarking on a search for answers that will sustain and nurture him.

Timeless, full of humility, yet powerfully self-effective – a fairy tale for adults that transcends all spiritual boundaries.
